Work History

Indroda Nature Park (Government Project)

Python, Django, MySQL

- Assigned a project primarily for updates, where I designed and created a new **landing page**.
- Migrated the **payment integration** system from **PayU** to **PayPhi** for improved transaction handling.
- Developed an **Excel spreadsheet** to track ans manage all booking and donation information on the dashboard.
- Integrated a **QR code** scanning feature to **automatically** record ticket bookings.

E-Commerce Website

React.js, Node.js, Express.js, MongoDB

- This final year project involved creating a comprehensive system with features including **user registration and login**, various **product lisiting**, **product comparison**, and **price-based product filtering**.
- Additionally, I developed a **dashboard** to track and display product **popularity.**
